

2024 CASE STUDY

Affordable Solvent Recovery for An Environmental Leader

Customer: GFL Environmental
Industry: Environmental Services
Unit Installed: Solvent Saver Batch Premium 110
(Rental – Share the Savings Program)

The Challenge

One of Canada's largest environmental services companies, GFL Environmental, needed a solvent recycling solution for its parts washing operations.

- Generated 2 drums/day (~3,000 gallons/month) of parts washing waste.
- Waste stream contained 10% oil and metal particulates, making disposal expensive and inefficient.
- Traditional equipment purchase wasn't ideal due to lower volume and upfront capital requirements.

The client required a flexible, low-risk solution that would improve solvent recovery while providing predictable costs and the ability to scale in the future.

The Solution

Maratek installed the SSBP-110 Solvent Saver System for GFL, provided through the Share the Savings Program.

- No upfront cost, with a simple rental model tailored to lower-volume generators.
- 110-gallon system designed for efficient recovery of solvent from oil- and particulate-heavy waste.
- Built-in automation and remote monitoring ensured reliable operation with minimal operator effort.
- Certified to Class I Division I Group D standards for maximum safety.
- Comprehensive training, support, and quarterly maintenance delivered confidence and peace of mind.

The Result

- **Cost Savings:** Reduced waste disposal costs by 70%, significantly improving operational efficiency and ROI.
- **Predictable Costs:** Rental model allowed solvent recovery without large capital investment.
- **Operational Reliability:** Automated features and remote support minimized downtime.
- **Flexibility:** The option to purchase later provided long-term security and scalability.

Why Maratek?

With over 50 years of experience and more than 1,500 systems installed, Maratek is trusted for its proven technology, automation, and compliance expertise. The Share the Savings Program offered the client a unique way to access solvent recovery technology with no capital investment, flexible terms, and industry-leading safety standards.
