

Solvent Saver - Flexo 200

Recover 200+ gal per Day
of Flexographic Solvent

Recover up to 95%
of Available Solvent

Full Automated
Remote Control

Quality Features

Stainless Steel Construction

All product contacting surfaces are 304 Stainless Steel.

Automation Features

Automatic Filling with Top Up

Automatic filling from a variety of containers. Topping up will automatically add more waste to the vessel during recovery.

Remote Access PLC

Lifetime remote viewing, control and Maratek support for your PLC is included.

Touch Screen PLC

A touch screen is included for PLC control and programming.

Automatic Sludge Discharge

After each cycle the sludge is discharged to a waiting container. A pump can also be equipped to transfer the sludge elsewhere if the sludge is pumpable.

High Pressure Clean in Place

40 PSI cleaning spray with multiple nozzles cleans the inside of the vessel between cycles.

Safety Features

Vacuum Assistance

A powerful vacuum system lowers the temperature required to boil solvent.

Anti Spill Sensors

The clean solvent and waste sludge containers are equipped with sensors to prevent spills.

Nitrocellulose Handling

The system uses Glycol Heating and high vacuum to minimize the temperatures required to prevent combustion of nitrocellulose. As an additional safety feature a water quench is also included.

C1D1

All Solvent Saver systems are MetLab Certified Class I Division I Explosion Proof.

References available upon request with installation in facilities across the US, Canada and globally.
